

Lab Task-1a:

1. Find the average value of the elements of an array.
2. Find the minimum and maximum value of the elements of an array.
3. Take two strings as your first and last name, then concatenate the two strings together so that you can find your full name:  
e.g. First name = "Nazia" and Lastname = "Hossain"  
output: full name = "Nazia Hossain"
